Centurion Electronics plc
Developers and suppliers of automotive infotainment systems

Prestigious Industry Award and New Supply Contract

Centurion Electronics, the UK provider of in-car infotainment systems, is pleased to announce the following update to shareholders:

- **New Supply Contract**

The Company has been awarded an additional new contract to supply an integrated in-car entertainment system (ICE) initially as an option across five vehicle models for Toyota Motor Europe.

The new premium ICE system designed and developed exclusively by Centurion, which is being phased in between November 2007 and December 2007, will provide a complete solution in in-car entertainment. The system is also designed to integrate within the vehicles interior and seat structure, whilst offering passengers access to the latest media formats.

Supply of this new system is expected to contribute to Centurions' revenues during the first quarter of the Company's financial year ending September 2008.

- **Prestigious Industry Award for Outstanding Performance**

The Company has received the 'Outstanding Performance for Cost Management and Development' Award from Toyota Motor Europe.

This award, underpins the close relationship between both Toyota and Centurion and recognises Centurion's investment in controlled cost management.

Furthermore, the award also reflects Centurion's close working partnerships with its key supply partners, in order to obtain the highest levels of quality and parts manufacturing resulting in cost savings overall for the customer.

Commenting on these developments, Chris Rhodes, Chief Executive, Centurion Electronics said:

"We are very pleased to have secured further business with Toyota Motor Europe and also to have achieved this important recognition from them.

"Firstly, the award reflects all the efforts that the team at Centurion have invested, particularly over the last 12 months in developing and strengthening the relationship with this key customer and secondly, investment in collaborative product development initiatives with Toyota ensures that their product offering meets market and technology expectations.

"Our strategic planning has also assisted to determine consumers' aspirations on new product development, which will support further market penetration."
