CENTURION LAUNCHES 2ND GENERATION PLUG & PLAY PORTABLE DVD SYSTEM

Centurion Electronics plc (Centurion), a UK market leader in the field of in-car audio-visual entertainment, has launched its 2nd generation Plug & Play portable DVD system, the PP60.

Features include:

- 6 inch TFT LCD monitor
- first system of its type to offer wireless sound through stereo headphones
- integrated stereo speakers
- for use in the car or at home
- in-car power supply and mounting bracket
- easily removable

Steven Cunningham, Chairman of Centurion, commented "The PP60 keeps Centurion at the cutting edge of in-car audio visual design. We have succeeded in maximising the screen size while at the same time making the overall system more compact. An added feature is the completely wireless sound through stereo headphones, an industry first in a system of this type."

About Centurion Electronics

Centurion is the UK's leading supplier of portable and in-car vision technology. Formed in 1993, the company has expanded its focus from vehicle security to innovative multi-media products based on leading-edge flat screen TFT LCD technology.

Its consumer range, "Plug & Play", is now sold in top high street retail chains throughout the UK. It has also developed a professional-series for a number of leading global car marques.

Headed by Steven Cunningham, the company is based in Welwyn Garden City, Hertfordshire.

Last year, Centurion was admitted to the Alternative Investment Market of the London Stock Exchange to help further raise the Company's profile and secure additional investment for further expansion and product development.
